

Plains States Zonal Forum of Narcotics Anonymous

The Plains States Zonal Forum would like to extend its thanks to all that responded to our previous request for input regarding participation in a US Regional Delegate Assembly.

Based on information from responses, 3 concerns were identified:

1. respondents requested additional information regarding purpose of the assembly
2. time conflicts between requested due date and local regional meetings affected timely responses
3. our initial time frame for the assembly event was not realistic

We have decided to pursue more input from the regions. We feel we are unable to define a true consciousness regarding this project. Some responses included questions about receiving more information regarding the event. This posed a difficulty in that we cannot assume responsibility for determining local regional topics; however, some examples could be as follows;

1. Are NAWS resources limited due to informational demands for attention
2. Are there ways to lessen the WB work load
3. How can local US resources be best allocated

We are asking you to supply comments on these examples as well as any other local projects/issues you may be aware of. Responses will be due by June 1, 2003. You will receive a compilation of these results in July, 2003. We are asking regions to be prepared to relay their final decisions and return their responses by January 1, 2004. These responses are necessary to plan and implement the delegate assembly in October 2005 should the regions so desire.

In loving service,

Plain States Zonal Forum
